CLOSED COUPLED CENTRIFUGAL PUMPS

3500RPM - 60Hz.
CAPACITIES TO 80GPM (5LPS)
HEADS TO 135 FEET (41M)

2900RPM - 50Hz.
CAPACITIES TO 68 GPM (4.3LPS)
HEADS TO 92 FEET (28M)

FEATURES

• FOUR POSITION CASING

Discharge can be located in any of four positions. Casing is close grain iron of 30,000 psi minimum tensile strength. Back pull-out design eliminates the need to disturb piping should the pump ever require service - the casing stays in the line.

• REPLACEABLE CASING WEAR RING

Prevents wear on casing and is easy to replace.

• EASY TO SERVICE

Taking out only 4 cap screws allows removal of pumping assembly without disturbing piping.

• ENCLOSED BRONZE IMPELLER

Enclosed bronze impeller is of latest hydraulic design for maximum efficiency. It is balanced for vibration free operation and threaded onto stainless steel motor shaft.

• MECHANICAL SHAFT SEAL

Standard self-adjusting shaft seal for temperatures to 225°F (107°C) and pressures to 150 psi (1034kpa). Ceramic seat and carbon seal face for long trouble-free service. Special seals are available for higher temperatures and fluids other than water.

• MOTORS

Standard pump motors have open drip proof construction and are rated with jet pump service factors for continuous duty operation. Motors are 56 frame size with NEMA standard mounting flange, one piece threaded stainless steel shaft and ball/ball bearing construction.

• FACTORY TESTED

After careful assembly and inspection, **EVERY** pump is factory tested and will meet Hydraulic Institute standards.

MAXIMUM OPERATING CONDITIONS

TEMPERATURE (For Standard Buna-N Seal)	225°F (107°C)
INLET PRESSURE	100 PSI (690 kpa)
CASING WORKING PRESSURE	200 PSI (1379kpa)

MOTOR INFORMATION

60 Hz - 3500 RPM - ODP

Single Phase: 1/3 thru 2 Hp. - 115/230 Volt
3 Hp. - 230 Volt only

Three Phase: 1/3 thru 3 Hp. - 208-230/460 Volt
50 Hz - 2900 RPM - ODP

Single Phase: 110/220 Volt

Three Phase: 380 Volt

Voltages may differ from some suppliers. Consult factory.

Overload Protection: All single phase ODP and Totally Enclosed motors have built-in overload protection. All three phase motors and all explosion proof motors must be installed with a magnetic starter which provides full 3-leg protection. Failure to use correct starter and overloads will void motor warranty.

JACKETED SEAL CAVITY

FOR TEMPERATURES TO 500°F (260°C).

Series G5-1-1/4 & G6-1-1/4 Pumps are available in a Jacketed Seal Cavity design for pumping hot oil, hot water and heat transfer fluids in common use in high temperature heating or cooling applications. This feature greatly extends seal life in high temperature applications. To order, add suffix "MJ" to pump catalog number for temperatures below 400°F (204°C) and add suffix "MJK" to pump catalog number for temperatures over 400°F (204°C). Example: G5-1-1/4MJ. See Section on High Temperature Pumps for more information.

SERIES: G5-1-1/4 & G6-1-1/4

* For hot water or caustic service.

** Includes Symbol 6 & 8

+ G5-1-1/4 and G6-1-1/4 Series pumps have been manufactured with either a flat or O ring type gasket. Determine which type is required before ordering. When in doubt, order flat gasket.

For technical advice or service please take your pump into your local pump service center.
To order pump or parts or for pricing please go to the following links :
