

**JABSCO® PUMPS**

Self-Priming Pumps

**MODEL: 44720-0000**

REVERSIBLE 12V. DC MOTOR PUMP UNIT

Product Data

**DESIGN FEATURES**

- Body: Phenolic-type plastic
- Impeller: **Jabasco Neoprene** Compound
- Seal: lip **type**
- Ports: 3/4" Garden **hose** external thread  
3/8" Pipe internal **thread**
- Motor: Reversible permanent type, fully **enclosed**, stainless steel shaft
- Dimensions: 3-1/4" (83mm) High, **6-1/4"** (159mm) Long, 5-1/32" (128mm) Wide.
- Weight: 41bs. (1.8 **kg**) (approx.)

**APPLICATIONS**

Bait tank circulation. Pumps in either direction for circulating and emptying bait containers. Ideal capacity for one and two scoop bait tanks. Flow at 10 ft. head: 2.5 GPM (9.5 **L/min**), amp. draw: 4.0 amps.

Ample fluid capacity at low ampere draw - conserves battery when used over extended periods for bait tank circulation.

Reversible motor enables the unit to be used for circulating or emptying bait tanks - controlled by optional three-way switch, Part No. 96070-0110.

Self-Priming - will not air-lock if flow is temporarily interrupted - insures circulation required to keep bait in top condition.

Dependable - trouble-free service when properly used.

Easy to Service - impeller or seals easily and quickly replaced with no special tools. Service kits available for added **convenience**.

Use only plastic internal port fittings. Part No. 92451-0070 - 3/8" pipe to 1/2" slip-on hose adaptor.

**INSTALLATION**

Pump is *not* designed to be submerged or be subjected to water spray or splash. Mount **the** unit in a dry location above bilge water levels.

Motor and impeller life will be greatly extended if pump body has some water in it when pump is started. This can be accomplished by **installing** intake and discharge lines so they drain into pump after shut-off. If pump has been idle for a long period water should be poured through the intake or discharge line to wet impeller.

Each season, the pump should be disassembled and cleaned.

MODEL 44720-0000 REVERSIBLE 12 VOLT D.C.

## MINIMUM WIRE SIZES

Connection Length Between Battery and Motor	12 V.
1-10 ft. (3m)	11.
11-20 ft. (6m)	'12
21-30 ft. (9m)	'10

CAUTION: Use only multi-strand copper wire in size recommended. DO NOT use ordinary lamp cord or other substitutes. Use 6 amp. fuse.

## WIRING DIAGRAM

Reversible wiring diagram with bottom view of three-way toggle switch, Part No. 96070-0110. Facing pump end of unit, the on-1 switch position will give right-hand port discharge. The on-2 position will give left-hand port discharge.
