

CASING - Casing is close grain iron of 30,000 psi minimum tensile strength. Back pull-out design eliminates the need to disturb piping should the pump ever require service - the casing stays in the line.

ENCLOSED BRONZE IMPELLER - Enclosed Bronze Impeller is of the latest hydraulic design for maximum efficiency. It is balanced for vibration-free operation. It is precision fit to shaft with key drive and cap screw lock.

MECHANICAL SHAFT SEAL - Standard self-adjusting shaft seal for temperatures up to 225°F (107°C) and pressures to 150 psi (1034kpa). Ceramic seat and carbon seal face for long trouble-free service. Special seals are available for higher temperatures and fluids other than water.

JM Type motors have NEMA standard mounting flange, extended steel shaft and dual bearings. These motors offer the advantage of quiet operation, controlled shaft deflection for longer seal life, and bearings sized to provide good service life. All motors are supplied by manufacturers with national field service facilities.

Flapper and check valves on the suction pipe are not required, but are recommended.

BRONZE SHAFT SLEEVE - Gasketed and keyed hook-type sleeve protects shaft from wear and corrosion in seal area.

FACTORY TESTED - After careful assembly and inspection, EVERY pump is factory tested and will meet Hydraulic Institute standards.

MOTOR INFORMATION

60 Hz - 3500 RPM - ODP

Three Phase: 5, 7-1/2 & 10 Hp. - 230/460 Volt
Voltages may differ from some suppliers. Consult factory.

Overload Protection: All motors must be installed with a magnetic starter which provides full 3-leg protection. Failure to use correct starter and overloads will void motor warranty.

MAXIMUM OPERATING CONDITIONS

TEMPERATURE (For Standard Buna-N Seal)	225°F (107°C)
INLET PRESSURE	100 PSI (689kPa)
CASING WORKING PRESSURE	200 PSI (1379kPa)
