FEATURES

- Triplex design ensures high-efficiency and low-pulsation.
- V-packings and low-pressure seals are completely lubricated and cooled, greatly increasing seal life.
- Special high-density, polished, concentric plungers provide a true wear surface and extended seal life.
- High-strength block-style design is built to handle the rigors of industrial-duty applications.
- Pump comes standard with NBR seals. Alternative seal materials are available for higher temperature or chemical compatibility.

⚠ CAUTIONS AND WARNINGS

All high-pressure systems require a primary pressure regulating device (e.g. regulator, unloader) and a secondary pressure relief device (e.g. pop-off valve, relief valve). Failure to install such relief devices could result in personal injury or damage to pump or property. Cat Pumps does not assume any liability or responsibility for the operation of a customer's high-pressure system. Read all CAUTIONS and WARNINGS before commencing service or operation of any high-pressure system. The CAUTIONS and WARNINGS are included in each Service Manual and with each Accessory Data sheet. CAUTIONS and WARNINGS can also be viewed online at www.catpumps.com/dynamic-literature/cautions-and-warnings or can be requested directly from Cat Pumps.
